Sea stars are among the most recognizable and iconic invertebrates of the marine realm. They can be vibrantly colored and fulfill a wide variety of ecological roles. Hence, it is not surprising that beginning marine aquarists so often wish to add these creatures to their collections. However, many of these starfish (and coral reef-associated starfish species in particular) require a fairly advanced level of care and a well-established aquarium system. In this regard, the common red starfish (*Fromia milleporella*) is no exception.

Ship models included in this program are built with LEGO® bricks. LEGO® is a trademark of the LEGO® group of companies which does not sponsor, authorize, or endorse this program.
